

FAIRBANKS®

NON-COMMERCIAL FORK TRUCK SCALE, 5950 SERIES

Fairbanks' Non-Commercial Fork Truck Scale weighs on the go, on almost any lift truck, eliminating wasted time and effort and increasing user profits through more accurate product tracking.

EASE OF OPERATION

The 5950 Series Fork Truck Scale is designed so a single operator can move and track materials simultaneously. As soon as the forks are raised, accurate weight readings are delivered to the on-board instrument. Then, with the push of a few buttons, the load is checked and tallied.

ACCURATE AND SAFE

The 5950 Series correctly weighs loads at various fork length and width positions, so accuracy is never compromised.

Operators are also ensured a clear view of the load and fork truck surroundings at all times.

CONTROLS AT YOUR FINGERTIPS

The indicator sits conveniently in the cab, allowing easy access for product tracking and accumulated weights. Choose from the 5950 Series indicator, which offers simple weight data with an optional RS232C output, or the 5900 Series indicator which has a full numeric keypad, as well as an optional RS232C output.

DURABLE CONSTRUCTION

The 5950 Series scales withstand punishing environments found in many industrial settings, from scrap yards to foundries to shipping docks. Field replaceable steel flexures and rugged construction ensure years of dependable service.

SPECIFICATIONS FOR 5950 SERIES FORK TRUCK SCALE

Model 5950 Series
Capacity 4000 x 2 lbs up to 20,000 x 5 lbs
Accessories..... Tape Printer ACC 5915

SPECIFICATIONS FOR 5950 SERIES INDICATOR

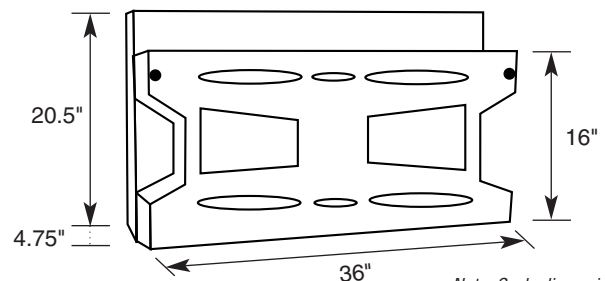

Model IND-5950 Series
